A scooter (also referred to as a motor scooter to avoid confusion with kick scooter, but not to be confused with a motorized scooter) is a type of motorcycle with a step-through frame and a platform for the rider's feet. Elements of scooter design were present in some of the earliest motorcycles, and scooters have been made since 1914 or earlier. Scooter development continued in Europe and the ...

Hi, I've been trying to build a quad for a while now, had to learn to weld and basically learn everything from scratch. I bought a 2008 250r ninja engine, had a loom ext and injection carbs but I really just wanted to remove all the loom and injection carb which I have done and replaced with a 250 zxr carb, I made my own loom which took some doing when you know nothing!

My choice is the BMW R1100S motorcycle engine.

Eliminating unnecessary movement from gear changes will help downshifts go much smoother. For clutch operation with a minimum of finger movement, make sure the point of full clutch disengagement is as far out from the grip as possible while still allowing for 2 to 3mm of freeplay at the end of the lever.
