PeopleSoft Learning : %InsertSelect meta sql in Peoplesoft

Application Engine comprises two distinct components—a designer where you define your batch program and the runtime environment where you run and monitor your program. In Application Engine, a program is a set of SQL statements, PeopleCode, and program control actions that enable looping and conditional logic.

PeopleTools 8.53: Application Engine - Oracle Help Center

"Hi, I have got an App Engine, where we try to upload the data from the staging table into the actual record. Here I have tried to include an override field. The assignment is an unsupported conversion, since I am trying to assign a string value into a numeric field. Is there any ways of converting the string value to numeric and then assigning...

%insertselect metasql in Peoplesoft - Tech

Calling COBOL Modules. If you add field names, Application Engine enables you to pass state record values to the called COBOL program and to get changes passed back to the calling PeopleCode program. If you pass the state record values in this way, use PTPECACH to retrieve and update values just as PTPEFCNV does. Code custom SQL.

PeopleTools 8.52 : Application Engine

%InsertSelect([DISTINCT,]insert_recname, select_recname [correlation_id][, select_recname_n [correlation_id_n]] [, override_field = value]. . .) I was trying to understand how %insertselect could be used. I have to admit I got stumped when I looked at the syntax and the examples in Peoplebooks .

PeopleSoft Technical Journey: %InsertSelect

Hey Jeromy, Nice blog, some really detailed article you have here :) Regarding the peoplecode, is the XSDschema and XMLSample data creation part necessary in the process or were you just showing us the App Engine coding for the XSD and XML sample data ? Im just curious as it wasnt referenced after the creation. Thanks and take care :)

Peoplesoft / Oracle tips: XMLP / App Engine / App Package
