### **How To Drain A Washer**

To completely drain your machine, lower the hose to floor level. The rim of your bucket or bathtub is probably too high for this, so switch to a gallon-size jug or bottle. Lay it on its side and cover its mouth with the hose's open end. Drain the bottle as it fills up, and repeat until the job is done.

### **3 Ways to Drain a Washing Machine by Hand - wikiHow**

If you don't see the clog in the pump or in the washing machine drain hose near the pump, then it could be stuck in the outlet where the hose connects to the bottom of the tub. To find out, loosen the clamp that holds the hose to the bottom of the tub and remove the hose.

### **How to Drain a Washing Machine That Won't Drain | The ...**

The drain hose loops to the top of the machine, and then down to the drain, enabling the tub to fill. When the water reaches the bend in the hose, it goes out of the drain. How to Drain Water Out of a Washing Machine. If you have water in your washer that hasn't drained, you have a couple of options.

### **Steps to Drain Water Out of Your Washing Machine | Home ...**

First start by unplugging the washer from the power outlet. If your washer is hard wired, flip the breaker off. If the washer has a large amount of water in it, get your empty bucket and begin to scoop out the water and pour it in the kitchen sink. Once you have removed as much water from your washer as possible, continue to next step.

### **How To Drain The Water Out Of A Washing Machine - Top Load ...**

STEP 1: Turn off the power. Switch the power button on the machine off, if your model has one. Unplug the washing machine from the power source. Duct tape the power cord to the top of the machine to avoid splashing it with water or getting caught under the machine. STEP 2: Locate the drain hose and water supply hoses.

### **How to Drain a Washing Machine (for Both Front- and Top ...**

Step 3. Check your washer to see if your washer has an accessible drain hose near the water pump filter. Get a bucket and unstop the drain hose and allow the water to drain into the bucket (or over a floor drain if you have one). It is a fairly slow process this way, but keep an eye on the bucket to make sure you don't allow it to over flow.
