A Differential is a gearing device in the center of an axle that essentially splits the rotational power between the two wheels that are on either end of that axle. Therefore, a differential allows the two wheels on the same axle to rotate at different speeds, or even one wheel to rotate while the other is motionless. All cars, trucks, large tractors, etc. have Differentials on their drive axles.

Lawnmower Parts & Accessories. Taking pride in your lawn is something that can be time consuming but also very rewarding. The time you put in is mostly spent pushing a manual lawnmower, unless you have a ride-on mower.. This essential piece of gardening machinery is so vital that you need to keep it performing at its peak all year round.
