I have a gas home oven and am wondering what the best way to create steam is. I have a small pan that sits on the oven floor that I dump boiling water into but I'm not sure it's doing the job well enough. I have to have the oven door completely open to get the water into the pan and slide it back before closing the door. I don't feel like enough steam isn't trapped inside

How do I create a Steam account? - Managing Your Account ...

If you want to steam vegetables on the stove, you will need a pot with a lid. If you have a steamer basket or a heat-safe colander, bring 2 cups of water to a boil in your pot, then place the vegetables in the basket and close the lid. Allow the steam to cook the vegetables for a few minutes, testing them periodically with a fork for doneness.
