Engine Cylinder Compression Test Guide. A car's engine needs cylinder compression to run correctly. This compression is caused by the engine pistons traveling upward to the top of the cylinder bore and then downward via the crankshaft. When a engine's compression is low in any particular cylinder it will cause a misfire which could trigger a check engine light.

How to Do a Compression Test in Under 30 Minutes

Compression socks or stockings can be found on the legs of a wide swath of the population, from pilots, flight attendants, runners, and nurses to pregnant women, people recovering from surgery, and people otherwise at risk for blood clots in their legs. Just as varied as the people wearing them are the stockings' materials and prices, with a pair selling anywhere from \$10 to well over \$100.
