hey john, i've even played around with event handling with undefined html element in the returnable project. While adding events to these nodes (in my case) worked as expected in firefox,opera , but in ie exposed only different quirks which needed you to dynamically add a child into the custom node,and then add handlers .

This validator checks the markup validity of Web documents in HTML, XHTML, SMIL, MathML, etc. If you wish to validate specific content such as RSS/Atom feeds or CSS stylesheets, MobileOK content, or to find broken links, there are other validators and tools available. As an alternative you can also try our non-DTD-based validator.

The W3C Markup Validation Service

Abstract. This document explains the syntax, vocabulary and the available APIs for HTML5 documents, focussing on simplicity and practical applications for beginners while also providing in depth information for more advanced web developers.This document is complimentary to the HTML5 Guide. Status of this document

Microdata is a WHATWG HTML specification used to nest metadata within existing content on web pages. Search engines, web crawlers, and browsers can extract and process Microdata from a web page and use it to provide a richer browsing experience for users. Search engines benefit greatly from direct access to this structured data because it allows them to understand the information on web pages ...

1 Introduction. According to Wikipedia (retrieved April 1 2012), "Scalable Vector Graphics (SVG) is a family of specifications of an XML-based file format for two-dimensional vector graphics, both static and dynamic (i.e. interactive or animated). The SVG specification is an open standard that has been under development by the World Wide Web Consortium (W3C) since 1999.

Work more efficiently. Let Storyline do more of the work for you. With productivity enhancements, Storyline 3 finds and replaces fonts in seconds, automatically scales and crops images to fit any placeholder shape, and maintains triggers when you swap out placeholder images.

Build Interactive E-Learning with Storyline 3

Continuing the above example, a requirement stating that a particular attribute's value is constrained to being a valid integer emphatically does not imply anything about the requirements on consumers. It might be that the consumers are in fact required to treat the attribute as an opaque string, completely unaffected by whether the value conforms to the requirements or not.
