1990 Toyota Corolla, 4AFE engine. The ignition timing is extremely retarded, about 20 or more degrees. I cannot set the base timing by jumpering the test points, there isn't enough range on the distributor. I've checked the timing belt and cam timing, it's spot on. This problem has gotten progressively worse over a period of a few weeks.

The Toyota E engine family is a straight-4 piston engine series, and uses timing belt rather than a chain. The E engines were the first multi-valve engines from Toyota designed with economy, practicality and everyday use in mind (rather than performance). Like many other Toyota engines from the era, the E engine series features a cast iron block, along with an aluminum cylinder head.
