How To Avoid Stalling A

Stalling the car when coming to a stop. Anything faster, the brake must be used first, followed by the clutch. When driving normally and you need to brake to a stop, use the brake initially and depress the clutch around 3 to 4 metres from where the car will stop. This can be done in any gear and at any speed.

How to Stop Stalling a Car - Driving Test Tips

Airspeed. Stalls commonly occur at slow airspeeds. For this reason, slow-speed flight, such as during approach and departure, are critical phases of flight, and pilots must be particularly cognizant at these times to prevent stalling the aircraft. A stall at cruise altitude offers the pilot enough space to recover.
