my honda gx120 motor will not start. It is aprox 5 years old and it runs a water pump. There is fire to the plug and gas in the carb and appears to have compression in the cylinder. do you have any ideas. could the valve seats be leaking? The on switch? The only thing I observed is that the crank case had about 1/2 quart to much oil.

Honda GX160 wont start.Have drained old fuel and thoroughly.... The way a carb works is that it needs vacuum pressure - created by the air flow through the 'horn' or 'throat' of the carb on the intake stroke. This vacuum creates a negative pressure at the top of the main jet (the tube that sticks up from the bowl into the throat), and draws gas out of the bowl.
