How To Drive A 5

I hope this video will help anyone wanting to drive a manual. I made a mount to hold the camera at pedal level. I also put a light to help light up the footwell area.

How to Drive a 5-Speed

How to Drive a Five Speed. The best way is to give the car some gas, rev slightly (no higher than 1800) and then let out the clutch slowly. Practice stops and starts on dead areas of straight roads, stay away from hills, intersections and turns etc. Once you master that, try doing the clutch and gas on the fly.

How to Drive a Five Speed - Car Forums and Automotive Chat

Put the shifting lever in D (DRIVE), step on the gas and go. Last time I looked, automatic transmissions shifted automatically. Automatic transmissions do not have stick shift either. Automatic transmissions have shifting control levers for low gear, second gear third gear, Drive, park and reverse.

can someone explain me how to drive a 5 speed automatic ...

You have the clutch pedal under your left foot, and then the brake in the middle, and then the gas pedal on the right. The gear shift is labeled. You start in first, then go to second, third, fourth, then fifth last. Once you get the hang of it, it's not that hard as long as you have coordination. Good luck to you.

Is It Hard To Learn How To Drive A 5-Speed?

Slide forward enough to allow you to press the clutch pedal (the left pedal, next to the brake pedal) fully to the floor with your left foot. 4. Press the clutch pedal and hold it to the floor. This would also be a good time to take note of how the travel of the clutch pedal differs from that of the brake and gas.
