OverHead Valve engines (OHV) As the name implies, OverHead Valve engines (OHV) have the valves located above the combustion chamber, in the roof of the cylinder head. The OverHead Valve layout permits smoother fuel mixture intake, plus quicker and more complete exhaust.

### **OverHead Valve engines (OHV) - OHV - Honda Engines**

This means they offer all the benefits of an OHV design and more. The OHC layout reduces the number of valve train components, which allows them to be lighter and stronger. This makes the engine more compact and lightweight overall. Honda's OHC design offers additional advantages:

Hi bill70j This OHC engine does not actually have a head. I initially thought it may but it is a different design than a regular OHV motor with pushrods. The case splits in two at an angle, so everything you have seen and inspected so far is pretty much all there is to the top end. ... Honda engines are expensive as I know, and if a crank can ...

I ran the supplied 10w30 in my 414cc ohv engine. its not a honda but most of the parts are interchangeable. That was for only an hour then I drained that out and put in 10w30 motomaster supreme. Its coming out at the 25 hour mark and 10w30 defy is going in it. I think a good quality 10w30 is a good bet.
