How To Use Manual Setting

To set the aperture (f/number), press and hold down the exposure compensation button while turning the rotating dial. The exposure compensation button on your digital SLR camera looks like this: To set the exposure, look through your viewfinder and press the shutter button half way down to focus on an object or scenery.

Tips for manual mode camera settings - SLR Photography Guide

Who can use it. Manual mode is for anybody with a mode dial on their camera, physical or virtual, dSLR, interchangeable-lens mirrorless, advanced compact or even a phone with manual controls. Note that on low-end cameras there might be a manual option, but it's not always really Manual -- it's just a less-automatic mode.

dSLR tips for beginners: How to use Manual mode - CNET

Aperture. Depth of field refers to how much of the image surrounding and behind the subject is in focus. A small depth of field is represented by a small number, so f2 would give a photographer a small depth of field, while f/22 would give a large depth of field. Depth of field is extremely important in photography,...

How to Use Manual Camera Settings on Your DSLR Camera

I've been reading to ton on the net about this and cant wrap my head around this. I want to take pictures outside (where the subject doesnt move) and balance it with ambient light using a few off camera flashes in manual mode. I get that you have 4 setting on your flash: distance, ISO, aperature and power. Then you have the setting on you camera: ISO, aperature and Shutter speed (which will ...

How to use manual flash settings? | Yahoo Answers

The general process of shooting in manual mode might look something like this: Check the exposure of your shot with the light meter visible through your viewfinder. Pick an aperture. Adjust the shutter speed. Pick an ISO setting. If the light meter "ticker" is lined up with 0 you have a "properly" exposed picture. Take the Shot.
