Ventilation is the intentional introduction of outdoor air into a space and is mainly used to control indoor air quality by diluting and displacing indoor pollutants; it can also be used for purposes of thermal comfort or dehumidification.. The intentional introduction of outdoor air can be categorized as either mechanical ventilation, or natural ventilation.

Ventilation (architecture) - Wikipedia

"Local exhaust ventilation." Local exhaust ventilation when used as described in (a) shall be designed to prevent dispersion into the air of dusts, fumes, mists, vapors, and gases in concentrations causing harmful exposure.
