Check the chain carefully for any sign of play in the rollers, wear or damage. Replace the chain if any wear exists. Timing chains are most often replaced because of a gradual increase in length and lack of proper tension. Inspect the tensioner plunger and replace it if it shows a deep grooving where the chain has ridden against it.

The Mitsubishi Astron or 4G5 engine, is a series of straight-four internal combustion engines first built by Mitsubishi Motors in 1972. Engine displacement ranged from 1.8 to 2.6 litres, making it one of the largest four-cylinder engines of its time. It became the first Japanese production engine to combine both electronic fuel injection (EFI) and turbocharging.
